Closing comments

- There is a burgeoning community interested in ATD.
 - RIA, SPIRAL2, SPES, ISAC, ISOLDE, ...
- A lot of the issues associated with ATD are common to all of us.
 - Radiation safety, target handling, waste disposal, regulatory issues, ...
 - Working groups?
 - We need to keep talking.

WATD

How do we capitalize on what we've discussed?

(a) Someone has to follow up on the work being done at different labs.

- Not a coordination of effort.
- Coordination of information?
- Reports at future meetings?

(b) Someone has to host future meetings.

- Progress can be reported; new issues identified.
- Annual event?
- Should the chair be responsible for (a)?
